Chief complaints

		Since.....
1	pain over chest, abdomen	
2	pain over B/L knee	6 month
3	(Rt > Left)	
4		
5		

History of present illness

Do NOT include the past history, smoking & other habits, previous operations and family History here, they should be entered further ahead.

Pt. was apparently alright 6 months back. To start with he developed pain over chest, abdomen and B/L knee (Rt. > Left). Pain was insidious in onset progressive in nature, mild to moderate in intensity, localised. Pain is aggravated on movement and relieved partially on taking medication and rest.

Medication being taken at the time of admission

Vaccination Status
