Surgeon's Name :

[redacted]

ANESTHESIA CONSENT FORM

Patient Name: [redacted] Age & Sex: 65y/m UHID No.: 20260225 431

Department: ORTHOPAEDICS Ward & Bed No.: MO-/31 Diagnosis: Polytrauma & Trauma to chest & abdomen & D/L Knee

Proposed Surgery/Procedure: _____ Anesthesist: _____ Anesthesia Type: _____

I _____, Self/Relative (_____) of _____ have been explained in my mother tongue the risks of the surgery/procedure , advised me of alternative treatments and told me about the expected out come and what could happen if my condition remains untreated . I also understand that anesthesia services are needed for the surgery/procedure.

It has been explained to me that all forms of anesthesia involve some risks and no guarantees or promises can be made concerning the results of my procedure or treatment. Although rare, unexpected severe complications with anesthesia can occur and include the remote possibility of infection, bleeding, drug reactions, drug allergies, blood clots, loss of sensation, loss of limb function, paralysis, respiratory arrest, stroke, brain damage, heart attack or death.

I understand that these risks apply to all forms of anesthesia and that additional or specific risks have been identified which may apply to a specific type of anesthesia. I understand that type(s) of anesthesia service/technique used for my procedure and that is determined by the clinical requirements.

It has been explained to me that sometimes an anesthesia technique which involves the use of local anesthesia, with or without sedation, may not succeed completely and therefore another technique may have to be used including general anesthesia.

I have been explained the risk and complication to my patient individual circumstances.

I do hereby give consent to undergo surgery/procedure under Anesthesia at my own risk. All pros and cons have been explained and discussed with me.

14. COUNTER SIGN BY ANAESTHETIST/ SURGEON	SIGNATURE NAME:		

Before induction of anaesthesia

(with at least nurse and anaesthetist)

Has the patient confirmed his/her identity, site, procedure, and consent?

- ☐ Yes

Is the site marked?

- ☐ Yes
- ☐ Not applicable

Is the anaesthesia machine and medication check complete?

- ☐ Yes

Is the pulse oximeter on the patient and functioning?

- ☐ Yes

Does the patient have a:

Known allergy?

- ☐ No
- ☐ Yes

Difficult airway or aspiration risk?

- ☐ No
- ☐ Yes, and equipment/assistance available

Risk of >500ml blood loss (7ml/kg in children) ?

- ☐ No
- ☐ Yes, and two IVs/central access and fluids planned

Before skin incision

(with nurse, anaesthetist and surgeon)

- ☐ Confirm all team members have introduced themselves by name and role.
- ☐ Confirm the patient's name, procedure, and where the incision will be made.

Has antibiotic prophylaxis been given within the last 60 minutes?

- ☐ Yes
- ☐ Not applicable

Anticipated Critical Events

To Surgeon:

- ☐ What are the critical or non-routine steps?
- ☐ How long will the case take?
- ☐ What is the anticipated blood loss?

To Anaesthetist:

- ☐ Are there any patient-specific concerns?

To Nursing Team:

- ☐ Has sterility (including indicator results) been confirmed?
- ☐ Are there equipment issues or any concerns?

Is essential imaging displayed?

- ☐ Yes
- ☐ Not applicable

Before patient leaves operating room

(with nurse, anaesthetist and surgeon)

Nurse Verbally Confirms:

- ☐ The name of the procedure
- ☐ Completion of instrument, sponge and needle counts
- ☐ Specimen labelling (read specimen labels aloud, including patient name)
- ☐ Whether there are any equipment problems to be addressed

To Surgeon, Anaesthetist and Nurse:

- ☐ What are the key concerns for recovery and management of this patient ?
